# PROPERTY OVERVIEW

## PROPERTY DESCRIPTION

Sale Price	TBD
Acreage	257 Acres
Closest Cross Streets	1-75/Swan Creek Rd
County	Monroe
Township	86.03 Acres – Berlin Township 171.35 Acres – Frenchtown Township
Zoning	Mixed-Use – Berlin Township LM – light manufacturing – Frenchtown Township
Topography	Flat
Rail	Yes – Norfolk Southern & Canadian National Railroad

## COMMENTS:

- **Direct access to power/ITC Transmission/DTE Energy**
- Ideal data center site with adjacent access to multiple 345kV lines
- Mixed-use zoning allows for data centers
- Access to I-275 and I-75 interchange and a direct route to the future Gordie Howe International Bridge, Ambassador Bridge, Port of Monroe, and national distribution routes
- Adjacent to the Meijer Distribution Center and \$150 million Ford Motor Distribution Center
- Berlin Charter Township Master Plan 2014 – amended June 2023 to mixed use for proposed future land use. Previously, the future land use was listed as industrial.
- All utilities available at the site
- Norfolk Southern Railway & Canadian National Railroad access
- Environmental Report Phase I & II (2023) – For the 20.92 AC/86.03 AC only
- Possible state incentives available

Total Acreage:	257.38 ±	<b>* Acreage is based on the Tax Assessment Information from Monroe County.</b>

# POWER SERVICE

## ITC TRANSMISSION/DTE ENERGY

Service to the 257 AC S Newport Rd would start with a 345-34.5kV substation and grow to include a 345 station for full load requirements.

### DTE LOAD STUDY – MAY 2025

#### INITIAL SERVICE FROM 345KV

- Two 345kV radial taps
- Land between 345kV corridor and customer site will need to be secured for line extensions (**This has been secured**)
- This line extension also requires railroad permits
- 345-34.5kV transformers if DTE supplied (240MW/trf)
- Customer can also procure 345-34.5kV equipment
- DTE or Customer to build/own substation
- Maximum connection of 240MW (with n-1)
- Substation should be located as close to 345kV lines as possible (Parcels 07-011-013-00 (24.56 AC) and 07-011-002-00 (52.30 AC))
- Substation footprint: may require 10 acres
- First transformer could be energized in 24-30 months / Second transformer: +6-8 months

#### LONG TERM SERVICE FROM 345KV

- ITC to build 345kV switching station
- 345-34.5kV transformers if DTE supplied / 150MW/trf or 240MW/trf
- DTE or Customer to build substation, taking connection at 345kV high side breakers
- Maximum connection may exceed 500MW
- Station/Substation should be as close to 345kV corridor as possible to minimize line extension needs (i.e. new towers)
- Station + Substation footprint: may require >20 acres
- Third 345kV transformer could be energized in 48-60 months from new 345kV station

# FIBER LOCATOR

Newport S Rd, Berlin Township, MI, USA

#### Metro Networks

- 123Net
- Crown Castle
- Everstream
- Uniti Fiber
- Windstream
- Windstream - Dark

#### Long Haul Networks

- 123Net
- Windstream
- Zayo North America
